

African Energy Transition

Value driven growth

Investor Presentation
July 2026

Disclaimer

The following applies to this presentation, including the slides, the information contained in the slides, any question and answer session, any oral presentation and any written or oral material discussed or distributed during the presentation meeting (together, the "Presentation").

This Presentation has been prepared by Afentra plc (the "Company") and is for information purposes only. This Presentation does not constitute an offer or invitation or a solicitation of any offer or invitation for the sale or purchase of any securities in the Company. In addition, it is not intended to form the basis of or act as an inducement to enter into any contract or investment activity and should not be considered as a recommendation by the Company to do so.

This Presentation is not intended for distribution to, or use by, any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation. The Presentation and the information contained herein must not be recorded, taken away, disclosed, copied, distributed, reproduced, transmitted or passed on, directly or indirectly, in whole or in part, to any other person or published in whole or in part, for any purpose or under any circumstances, without the prior written consent of the Company.

This Presentation is not for release, publication or distribution, directly or indirectly, in whole or in part, in or into the United States of America, its territories or possessions, any state of the United States or the District of Columbia (collectively, the "United States"), Australia, Canada, Japan or South Africa. This Presentation is not an offer of securities for sale in the United States or any other jurisdiction. The Company has not registered and does not intend to register any of its securities under the US Securities Act of 1933, as amended (the "US Securities Act"). Securities may not be offered or sold in the United States absent registration or an exemption from the registration requirements of the US Securities Act.

Certain statements in this document are forward-looking statements which are based on the Company's expectations, intentions and projections regarding its future performance, anticipated events or trends and other matters that are not historical facts. These statements are not guarantees of future performance and are subject to known and unknown risks, uncertainties and other factors that could cause actual results to differ materially from those expressed or implied by such forward-looking statements. Factors that would cause actual results or events to differ from current expectations, intentions or projections might include, amongst other things, changes in oil prices, changes in equity markets, failure to establish estimated petroleum reserves, political risks, changes to regulations affecting the Company's activities, delays in obtaining or failure to obtain any required regulatory approval, failure of equipment, uncertainties relating to the availability and costs of financing needed in the future, the uncertainties involved in interpreting drilling results and other geological, geophysical and engineering data, delays in obtaining geological results and other risks associated with offshore exploration, development and production. Given these risks and uncertainties, readers should not place undue reliance on forward-looking statements. Forward-looking statements speak only as of the date of such statements and, except as required by applicable law, the Company undertakes no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise.

Certain industry and market data contained in this Presentation has come from official or third party sources. Third party industry publications, studies and surveys generally state that the data contained therein have been obtained from sources believed to be reliable, but that there is no guarantee of the accuracy or completeness of such data. While the Company believes that each of these publications, studies and surveys has been prepared by a reputable source, neither the Company nor its directors, officers, employees or advisers or any other person has independently verified the data contained therein. In addition, certain of the industry and market data contained in this Presentation come from the Company's own internal research and estimates based on the knowledge and experience of the Company's management in the market in which the Company operates. While the Company believes that such research and estimates are reasonable and reliable, they, and their underlying methodology and assumptions, have not been verified by any independent source for accuracy or completeness and are subject to change without notice. Accordingly, undue reliance should not be placed on any of the industry or market data contained in this Presentation.

Certain financial information contained herein has not been audited, comforted, confirmed or otherwise covered by a report by independent accountants. When and if audited financial information for the Company is published or becomes available, the data could vary from the data set forth herein. In addition, past performance of the Company cannot be relied on as a guide to future performance. Unless specified otherwise, no statement in this Presentation is intended as a profit forecast or estimate for any period and no statement in this Presentation should be interpreted to mean that earnings or earnings per share for the Company for the current or future financial years would necessarily match or exceed the historical published earnings or earnings per share for the Company.

Certain figures contained in this Presentation may have been subject to rounding adjustments. Accordingly, the actual arithmetic total of numbers may not conform exactly to the total figures and percentages may not conform exactly to percentages that would be derived if calculations were based on rounded numbers.

The information in this Presentation, which does not purport to be comprehensive, has not been verified by the Company or any other person. No representation or warranty, express or implied, is or will be given by the Company or its directors, officers, employees or advisers or any other person as to the accuracy or completeness of the Presentation and, so far as permitted by law, no responsibility or liability is accepted for the accuracy or sufficiency thereof, or for any errors, omissions or misstatements, negligent or otherwise, relating thereto. In particular, but without limitation, (subject as aforesaid) no representation or warranty, express or implied, is given as to the achievement or reasonableness of, and no reliance should be placed on, any projections, targets, estimates or forecasts and nothing in this Presentation is or should be relied on as a promise or representation as to the future. Accordingly, (subject as aforesaid), neither the Company, nor its directors, officers, employees or advisers, nor any other person, shall be liable for any direct, indirect or consequential loss or damage suffered by any person as a result of relying on any statement in or omission from the Presentation or any other written or oral communication with the recipient or its advisers in connection with the Presentation and (save in the case of fraudulent misrepresentation or wilful non-disclosure) any such liability is expressly disclaimed.

The information contained in this Presentation should not be assumed to have been updated at any time subsequent to the date shown on the cover hereof. In furnishing this Presentation, the Company does not undertake any obligation to provide any additional information or to update this Presentation or to correct any inaccuracies that may become apparent.

Afentra Plc – Building an African Independent

Emerging African Independent with Cash-Generating Assets & Growth Trajectory

Key milestones

- 2021**
 - Afentra PLC formed with \$40m cash on balance sheet
 - Signed foundation SPA with Sonangol
- 2022**
 - Signed second SPA with INA
 - Completed INA acquisition
 - Signed third SPA with Azule
- 2023**
 - Completed Sonangol acquisition
 - Completed Azule acquisition
 - Signed KON19 Licence award
- 2024**
 - Returned to net cash of \$12.6m
 - Signed KON15 Licence award
- 2025**
 - Signed SPA with Etu Energias
 - Initialing of KON4 Licence
 - Signed Block 3/24 RSC
- 2026**
 - Sonangol joined Etu acquisition
 - Drilling commences in Block 3/05
 - KON4 licence awarded

Emerging African Independent E&P focused on production, near-field development & exploration

Strategic footprint in Angola, expanding through value-accretive M&A

Experienced team with strong track record of responsible asset stewardship

Paul McDade CEO

- 35+ years' global experience
- Former COO and CEO of Tullow, strong focus on delivering stakeholder value

Anastasia Deulina CFO

- 25+ years in global energy finance
- Track record of delivering sustainable business growth

Ian Cloke COO

- 25+ years' global oil & gas experience
- Experience in Africa of deploying innovative technologies & solutions

Proven Value Creation Through Disciplined Capital Allocation

Building scale, production and cashflow through strategic investment

→ **Cash-generative production base, strengthened balance sheet and carried drilling programme support the next phase of production and resource growth**

H1 2026 Highlights

Building momentum across operations, financing and portfolio growth

Net Production

5,777 bopd

Crude Oil Sales

~1 mmbbls

Revenue

\$91.0 million

Cash Balance

\$97.4 million

Net Cash

\$28.4 million

Total Debt

\$70.0 million

- **Strategic Review concluded**, Afentra will pursue the next phase of growth as an independent E&P company.
- **Balance sheet strengthened**, completion new \$125 million Gunvor financing facility and \$40 million equity fundraising.
- **Offshore drilling programme progressing**, fully carried Pacassa SW well underway and initial results expected in late July.
- **Strong operational cash generation**, supported by two crude liftings generating revenue of \$91.0 million.
- **Portfolio expansion progressing**, KON4 formally awarded and Etu transaction expected to complete in Q3 2026.

→ **Executing the next phase of growth through disciplined investments and financial strength.**

H1 2026 Cash Reconciliation (\$m)

Strong asset cash generation supporting investment, balance sheet strength and future growth.

¹ Adjusted for Dec-25 revenue prepayment, offtake fees, & hedge payouts.
² Reflects the net proceeds from the £70 million prepayment facility drawdown after RBL repayment, interest and refinancing-related fees.

³ Reflects net proceeds from the completed equity raise.
⁴ Includes costs associated with the strategic review and employee share schemes.

Structured Offtake Profile, Volumes Projected to Rise

Production growth from drilling & development activities support lifting volumes through 2028

■ Realised liftings ■ Projected liftings

Revenue	\$33.8m	\$57.2m
Less PIT	\$(2.2)m	\$(3.5m)
Post-Tax Revenue	\$31.6m	\$53.7m
Realised price	\$65.38/bbl	\$119.27/bbl

→ **Active management of crude oil sales delivers regular revenues and enables averaging of commodity price cycle**

Commodity Price Risk Management

Disciplined Hedging Strategy Secures Downside While Preserving Upside Exposure

Hedging Position

- ~48% of 2026 forecast sales hedged following selective execution
- Combination of puts and collars provides downside protection while retaining meaningful upside exposure
- Average weighted hedge premium cost to date of c.\$1/bbl across 2026 hedges
- Further hedges will be progressively layered in line with market conditions and prepayment facility requirements

Hedge coverage by cargo period

Hedge structure summary

Collar range (\$/bbl)

\$60–73 floors / \$78–115 caps

Put range (\$/bbl)

\$60 - \$68 floors

→ Hedging strategy underpins cash flow resilience and supports funding of the development programme

Funding Secured to Underpin Next Phase of Growth

Refinancing objectives achieved, strengthening liquidity and capital flexibility

REFINANCING OBJECTIVES

Secure >\$100m facility

Liquidity to fund the near-term development programme

Lower cost of capital

Pricing to reflect the de-risked, cash-generative asset base

Realign offtake costs to market

Improve netbacks and commercial flexibility

Capital flexibility

Secure headroom flexibility to fund organic growth, development, and selective inorganic opportunities

HEADLINE TERMS — GUNVOR PREPAYMENT FACILITY

\$125m

Prepayment facility

4 years

Tenor

SOFR + 6%

Margin

→ **All refinancing objectives delivered - improved margin and offtake economics, enhanced commercial flexibility and headroom to support future growth**

Gunvor Facility

Refinancing provides flexible debt structure at lower cost of capital

Debt Maturity Profile

Facility	Principal Tranches (\$m)		Rate	Maturity
	2026	2027		
Gunvor PPF	100	25 ¹	Term SOFR + 6%	2030

Gunvor PPF Repayment Profile

→ **\$125m prepayment facility replaces the existing RBL and working capital facilities, extends maturities and supports funding of the near-term work programme**

Facility Overview

- \$125m committed (\$100m + \$25m), plus uncommitted accordion²;
- Term SOFR + 6% margin
- 4-year tenor
- 12-month principal repayment grace period

Key Covenant

- Advance life coverage ratio (ALCR) covenant $\geq 1.3x^3$

Security

- Secured by Block 3/05 & 3/05A liftings

Crude Offtake & Use of Proceeds

- Entitlement volumes marketed through Gunvor
- Total committed volume: 8 mmbbls
- Minimum annual commitment: 1.8 mmbbls
- Proceeds: refi existing RBL debt, fund work programme and G&A

¹ Tranche 2 is subject to delivery of 1.8mmbbls in first 12 months of the facility and certain production hurdles. **10**

² Un-committed accordion to scale facility size based on future production growth.

³ ALCR measures forecast future revenues from the secured assets relative to outstanding debt under the facility.

Equity Raise Accelerates Next Phase of Growth

Capital

- ✓ **US\$40 million raised**
 - Strong institutional demand resulted in a heavily oversubscribed book
- ✓ **Priced at 67p per share**
 - 5.2% discount to closing price prior to launch
- ✓ **Retail offer launched alongside placing**
 - £3.6m demand received against a £2.0m offer size

Register

- ✓ **21 new institutional investors added**
 - 52% of placing allocated to new investors
- ✓ **Long-only ownership materially increased**
 - Long-only institutions increased from 21% to 32% of register
- ✓ **Balanced shareholder base established**
 - Increased depth and diversity across investor base

Shareholder Base

- ✓ **Existing shareholder support maintained**
 - 11+ existing shareholders increased positions
- ✓ **Director participation alongside investors**
 - Demonstrating alignment with shareholders
- ✓ **International shareholder base established**
 - Participation from UK, Europe, North America, Asia and South Africa

→ **The transaction broadened Afentra's institutional shareholder base and positioned Afentra to improve liquidity and support long-term share price performance.**

Existing Portfolio Driving Material Organic Upside

Offshore scale and onshore fast-cycle optionality underpin Afentra's growth strategy

Offshore

- >20kbopd net production potential
- Infrastructure-led redevelopment programme
- Material resource conversion opportunity
- Significant exploration potential

Oil Rate kbopd (net)

Onshore

- Material emerging Kwanza Basin optionality
- Early oil production from legacy field reactivation
- Underexplored proven hydrocarbon basin
- Proximity to refinery supports rapid monetisation

→ Offshore redevelopment provides visible multi-year production growth; onshore offers scalable, fast-cycle exploration and development potential

Multi-Billion bbl Shallow Water Assets Offshore Angola

Significant recovery upside potential across Block 3/05 (30%), 3/05A (21.33%) & 3/24 (40% op)

Vast underdeveloped asset with substantial potential to → increase production and replace reserves through organic growth, whilst reducing emissions

Scale of the Prize

Oil & Gas in Place

>3.7 bbo **~ 1.2 Tcf**

Reserve & Resource Potential

>250 mmbo **>550 Bcf**

Current 2P reserves: 106 mmbo

Top 10 UK North Sea Assets by Remaining Volumes (mmboe)

Greater Block 3/05 Area would be the 2nd Largest UKCS Asset

Infrastructure Rejuvenation – 70% complete

Substantial investment has upgraded core infrastructure and extended asset life

2022

FSO Recertification

Complete
Out to 2035

Asset Life Extension

Integrity upgrades to
complete end 1H 2027

Power & Mechanical Revamping

Reliability and uptime
improvements

Water Injection Restoration

Recovery optimization.
Targeting 100+kbwpd in 2026

→ Infrastructure investment almost complete transforming and de-risking the asset

Pacassa SW– Unlocking Large, Undrilled Potential

Drilling underway on Pac SW-1 well; potential to open-up significant extension of the Pacassa Field

Potential Oil in place^{1,2}

32–210 mmbo

Pac SW Supported by:

Well defined structural closure

Highly productive offset wells

Oil migration pathway

Independent review

Pacassa SW-1- Potential²

- 5000+ bopd expected initial rate
- US\$50m well cost carried by Sonangol³
- First Oil target for Q3 2026

Development Potential

- Up to 3 additional wells
- Resource potential of up to 70 mmbo ^{2,4}
- Successful well could trigger development of new “SW Pacassa” field

Q2 2026

Drill & Complete PacSW-1

Q3 2026

First Oil

2026/27

Review potential for additional development

→ **Pac SW-1 being drilled from existing infrastructure; Objective is to unlock large un-tested fault block and deliver early production and material reserves upside**

Pacassa Field - Unlocking Large Undrilled Potential

Underlying reserves: 51.5 mmbo expected from base production, supported by waterflood uplift and LWIs

~10 mmbbls to be delivered from two HWO campaigns

Pac SW well could double existing field reserves.

Infill drilling in attic & flank could increase recovery further

Gross Production (kbopd)

Gross Recoverable Volumes (mmbo)⁽¹⁾

Impala Field – Proven Resource, Material Untapped Potential

Impala-2 well planned for Q3 2026, potential for significant additional reserves

Oil in place¹

60–200 mmbo

Recovery To Date

12 mmbo

4000 bopd peak

1 production well

Impala 2 – Potential¹

- 4000 bopd expected initial rate
- US\$50m well cost carried by Sonangol²
- First Oil target for Q4 2026

Impala Field Development

- Up to 3 additional wells
- Reserve potential of up to 50 mmbo¹
- Opportunity to replicate in other fields

Q3 2026

Drill & Complete Impala-2

Q4 2026

First Oil

2026/27

Review potential for additional development

→ **Impala-2 drilled from existing infrastructure can unlock material existing undeveloped resource and deliver early production and reserves upside**

Impala Area – Scaling a Proven Resource Base

Underlying reserves: 8.4 mmbo expected from base production, waterflood uplift and IMP-001R restart

Impala-2 unlocks field redevelopment

IPSE S Area redevelopment potential

>5x resource potential

Gross Production (kbopd)

Gross Recoverable Volumes (mmbo)⁽¹⁾

HWO Programme – Restoring Production from Shut-in Wells

Low-cost interventions to unlock incremental reserves & resources

Recoverable Potential¹

10–25 mmbo

Work Completed

Well integrity review

Candidate screening

Phase 1 wells selection

Preparation for HWU² tender

HWO-Phase 1 – 2026 Campaign¹

- 3 workovers (integrity + gas lift failures)
- ~3,500 bopd expected uplift in Yr 1
- US\$5-10m cost per workover
- First restarted well online Q4 2026

Future Potential

- 20+ candidates screened in B 3/05
- Repeatable low-cost HWO cycles

Q4 2026

HWU mobilisation

Q4 2026

First restarted well online

2027+

Evaluation 20+ wells for Phase 2

→ **Short-cycle, low-cost restoration of shut-in wells delivering near-term production uplift from 2026**

Palanca Field– Restoring Shut-In Production Potential

Underlying reserves: 13.1 mmbo expected via PAL-F1/F2; supported by a ramp-up in water-injection and 4 LWIs in 2026 to optimise near-term recovery

Multi year HWO campaign planned

Infill drilling to commence from 2027

~3x resource potential

Gross Production (kbopd)

Gross Recoverable Volumes (mmbo)⁽¹⁾

Block 3/24 – Near-Term Development Opportunity

Three Proven Discoveries, Low-Cost Operated Development, FID Q4 2026

Block 3/24 Potential¹

- Portfolio diversity: 10 oil & gas discoveries, includes 3 previously produced fields
- All wells tested, with flow rates up to 6,000 bopd
- Estimated >190 mmbbls STOIP and 400 BCF GIIP already discovered
- Reservoirs will be fully re-evaluated using modern techniques
- Future seismic acquisition to assess exploration potential across block

GPQ – Infrastructure-Led Development Plan

- Discoveries ~5km from Palanca infrastructure,
- Palanca infrastructure has significant available processing capacity
- Shallow water depths suitable for small-scale platform deployment
- Well re-entry & subsurface optimisation underpin low-cost execution
- Phased execution planning to re-access wells and fast-track first oil

→ Operated development being fast-tracked toward ~10,000 bopd project, targeting FID in Q4 2026

Offshore Redevelopment Programme

Phased execution to deliver material production growth

Infrastructure led redevelopment programme

Targeting material growth in production and reserves

Multi-year drilling, HWO and exploration programme

Combined programme
targeting **13kbopd in 2028**

Oil Rate kbopd (net)

→ **Targeting ~13kbopd near-term, with further upside to >20kbopd**

Programme

- 2 wells drilling in 2026 (costs carried)
- Initial HWO campaign
- Additional HWOs + Palanca South
- Block 3/24 GPQ development

Timing

- Production uplift beginning Q3 2026
- Block 3/24 targeting First Oil 2028
- Phased production growth through 2027+

Capex

- Fully carry on 2026 drilling
- 2026 to 2028 Capex ~\$200m net

Block 3/05 Area - Production Growth Drives Lower Unit Costs

Higher production reduces opex per barrel and increases cash generation

Opex vs Production

→ Increasing production lowers unit operating costs, driving a material uplift in asset level cash generation

Near-Term Investment Drives Step-Change in Cash Generation

Production growth drives significant cash generation

Funding Visibility Secured

Development programme supported by asset cash flow and committed liquidity

Cash Flow Inflection

Material step-up in cash generation from 2028

Net WI Production

Pre- Capex Asset Cash Generation (\$M)²

→ Near-term investment funds high-return development, delivering step-change in production and significant cash generation from 2028, with strong leverage to higher prices

Untapped Hydrocarbon Potential

- 3.5 Bn boe discovered (2P reserves)
- 2.5 Bn boe produced
- ~600 exploration wells drilled (1950s – now)

Onshore Lower Congo Basin (~25k Sqkm)

- >2 Bn boe discovered (2P reserves)
- 0.5 Bn boe produced
- ~350 exploration wells drilled (1950s – now)

Onshore Kwanza Basin (~29k Sqkm)

- <100 MMboe discovered (2P reserves)
- 90 MMboe produced
- ~130 exploration wells drilled (1950s – 1982)

→ **The onshore Kwanza basin is an under-explored hydrocarbon basin offering a unique opportunity with significant upside potential**

High-Impact Exploration Pipeline - Kwanza Onshore

Systematic prospect maturation underway across a proven underexplored hydrocarbon basin

EXPLORATION DRILLING

Target Exploration Well(s) 2027

Proven Working Hydrocarbon System

Historic production, oil shows and legacy discoveries validate an active petroleum system across the basin

Underexplored Relative to Peer Basins

Limited historic exploration despite comparable geology to more mature West African onshore basins

Disciplined First-Mover Advantage

Applying modern subsurface techniques to systematically unlock overlooked basin potential

→ **Kwanza Onshore adds material exploration optionality to Afentra's core offshore growth strategy, with targets of up to 350mmbo¹ OIIP currently mapped**

Accelerated Path to Early Production–Quenguela Norte

Large discovered resource supported by existing route-to-market infrastructure

EARLY PRODUCTION
Target First Oil 2027

Large Discovered Resource Base

220 mmbo OIP across Quenguela Norte, Legua and Benfica previously produced fields

Existing Route to Market

50km trucking route to Luanda refinery via established road with available capacity

Fast Cycle Monetisation Opportunity

Low-cost pathway to early cash flow

→ **Clear redevelopment pathway positions Quenguela Norte as a near-term onshore value catalyst**

Kwanza Onshore – Value Driven Strategic Opportunity

Building a Strategic Acreage Position

Early Production Opportunity

- Previously produced oil fields offering considerable untapped potential
- Licenses benefit from favourable fiscal terms
- Potential for low-cost re-development of existing fields
- Cash flow generation through early production to Luanda refinery

Low-Cost exploration in proven Basin

- Proven hydrocarbon basin with record of oil production
- Deploying team's significant experience in low-cost onshore exploration
- Strengthening Angolan relationships by supporting local companies explore Kwanza onshore

→ **Afentra is well-positioned to unlock early production and untapped exploration opportunities**

Activity Roadmap: Milestones & Catalysts

★ FID — Execution △ First Oil ✂ eFTG Survey 🌀 Seismic 🏠 Well Re-entries/drilling

Multiple Pathways to Long-Term Value Creation

Material Offshore and Onshore portfolio with potential for expansion

OFFSHORE

- + **Production**
6K → ~13k → >20k bopd
- + **2P Reserves**
Maturation of 2C resources to 2P reserves
- + **Exploration Upside**
Only 1 dry hole in 160 wells drilled
New 3D seismic planned

ONSHORE

- + **Early Revenue**
Quenguela Norte First Oil
Targeting 2027
- + **Exploration Platform**
Proven basin with material potential
- + **Route-to-Market Validation**
Establishing repeatable onshore development model

PORTFOLIO EXPANSION

- + **Angola Licence expansion**
First mover advantage in Angola
Low-cost acreage additions
- + **Production acquisition**
Replicating Afentra model
Disciplined, value-accretive
- + **New country entry**
Same playbook

→ **The current redevelopment programme underpins the base growth case, with additional upside across the broader business**

Afentra - Roadmap to Accelerated Value Creation

Clear pathway to production growth, cash flow expansion and value driven growth

→ Afentra is positioned to accelerate growth and unlock the next phase of shareholder value creation

APPENDIX

Five Years of Delivery, Positioned to Accelerate Growth

A unique strategic position built through disciplined execution

→ Afentra enters next Phase of growth from a position of strength, supportive market backdrop further enhances value potential

Strengthened Board and Team

Deep experience and expertise across Africa

Thierry Tanoh
Chairman

Thierry Tanoh is an experienced senior director with global experience, a strong track record in both public and private sectors and has held senior positions within African Government ministries. Relevant experience includes various roles within International Finance Corporation (IFC) as Vice President within the Senior Executive Team and a member of IFC's credit committee based in Washington, and Director of Sub-Saharan Africa based in Johannesburg. Following 12 years with IFC, Mr Tanoh was appointed as CEO of Ecobank Group, a pan-African banking conglomerate with banking operations in 33 African countries. Following his departure in 2014, Mr Tanoh was appointed a member of the office of the President of the Republic of Cote d'Ivoire, serving initially as Minister, Deputy Chief of Staff before being appointed as Minister for Oil, Energy and Renewable Energies between 2017-18.

Paul McDade
Chief Executive Officer

Paul's 35 years within the international Oil & Gas business has provided him with a rich and diverse set of relevant experiences. From his, social, security and safety environmentally international experience in challenging operational, to his 19 years as COO and then CEO of Tullow Oil, he has essential first-hand experience of what is required to build a successful African-focused, responsible oil & gas company. His strong focus on delivering stakeholder value, shared prosperity, environmental performance and strong governance, coupled with his understanding of the role that Oil & Gas has to play in both the global and African energy transitions, makes him the ideal leader to deliver Afentra's ambitious growth strategy, a company that will have stakeholder objectives and ESG embedded at its core.

Anastasia Deulina
Chief Financial Officer

Anastasia's multicultural upbringing and over 25 years of working in the energy sector within global, tier-1 investment banks, private equity and corporates has given her extensive experience in strategy development, deal origination, structuring and execution, M&A and business transformation. Her primary focus is always on driving sustainable business growth that has a visible positive impact on the bottom-line. This, along with her significant prior board experience, both as a NED and committee member, and her strong global business development and financial network means that Anastasia provides expert leadership as Afentra's CFO.

Ian Cloke
Chief Operating Officer

Ian has over 25 years experience of working in international Oil & Gas with a proven track record of delivering operational, technical and commercial results. His focus and background of deploying innovative technologies across global upstream has delivered significant value for all stakeholders. As EVP at Tullow Oil, he led multi-cultural and diverse teams delivering operations safely and at pace across Africa and South America, from remote onshore to ultra deepwater, effectively managing risk and social-environmental sensitivities whilst embedding strong financial discipline. He has first-hand experience in making a difference in countries having discovered and delivered commercial oil & gas in Uganda, Kenya and Guyana. Having lived and travelled throughout Africa, he has enjoyed the full spectrum of life and business on the continent, making him an ideal founding partner and COO of Afentra.

Gavin Wilson
Non-Executive Director

Gavin Wilson has held the position of Investment Director at Meridian Capital Limited, a Hong Kong based international investment firm, for over a decade, managing an Oil & Gas portfolio focused on world-class assets in emerging markets. Mr Wilson founded and managed, for over seven years, two successful investment funds - RAB Energy and RAB Octane. Previously he was Managing Partner of Canaccord Capital London's Oil & Gas division, responsible for Sales and Corporate Brokering/Finance.

Andrew Osborne
Non-Executive Director

Andrew Osborne has over 30 years' experience in senior executive and board leadership roles across the global oil & gas industry and investment banking. He has a strong track record in business transformation, M&A, capital markets and strategic financing. Most recently, he served as EVP (Special Projects) at Harbour Energy, leading major growth and transformation initiatives, including the \$11.2 billion acquisition of Wintershall Dea's portfolio. Previously, as CFO of Chrysaor, he played a key role in building the company from a start-up into the U.K.'s leading independent oil & gas producer, securing private equity investment, executing multi-billion-dollar acquisitions and leading its public listing through the reverse takeover of Premier Oil. Earlier in his career, Andrew held senior investment banking roles with Merrill Lynch, advising FTSE 100 and 250 boards on strategy, capital raising and corporate transactions. His extensive financial and strategic experience supports Afentra's continued growth and value creation.

Wider Afentra Team

Highly experienced individuals across technical, commercial, legal and finance disciplines

2026/27 Hedging Portfolio

Hedge structures, volumes and strikes prices by expected sales period

Cargo period	Total sales volume (bbls)	Total hedged volume (bbls / %)	Collar volume (bbls / %)	Put volume (bbls / %)	Collar (\$/bbl)	Put floor (\$/bbl)

Afentra Increases Exposure to Blocks 3/05 and 3/05A

Building Scale and Alignment in Core Angola Assets

Acquisition Highlights

- Increases Afentra interest to:
 - 33.33% in Block 3/05
 - 24.99% in Block 3/05A
- Consideration:
 - Upfront - \$15.20 million¹,
 - subject to customary completion adjustments
 - Contingent payments – up to \$6.74 million
 - \$4m across 2025² & 2026 on sliding scale \$75/bbl - \$123/bbl
 - \$2.74m subject to development of 3/05A discoveries
- Deal metrics mirror previous transactions c. \$4/2P mmbbls
- Effective date 31 December 2023
- Further consolidation of joint venture partnership

Impact of Etu Acquisition

Net Average Production 2025 **6,324 bopd** ➔ **7,035 bopd**

Net 2P+2C Reserves & Resources YE 2025 **120 mmboe** ➔ **130 mmboe**

2025 Revenue **\$114.4 million** ➔ **\$126.0 million**

Post completion interests	INA deal	Sonangol deal	Azule deal	Etu deal
Block 3/05				
Sonangol (op.)	50%	36%	36%	39.34%
Afentra	4%	➔ 18%	➔ 30%	➔ 33.33%
Maurel & Prom	20%	20%	20%	23.33%
Etu Energias	10%	10%	10%	0%
NIS Naftagas	4%	4%	4%	4%
Block 3/05A				
Sonangol (op.)	33.33%	33.33%	33.33%	39.34%
Maurel & Prom	26.67%	26.67%	26.67%	30.33%

➔ **Disciplined, step-by-step expansion of Afentra's working interest in world-class, producing and development assets through smart value accretive acquisitions**

Value Driven Deal Making

Transaction Timeline (Effective Date)	 (Sep-21)	 Sonangol (Apr-22)	 (Oct-22)	Aggregate
Upfront Consideration	\$12.0m	\$56.5m	\$48.5m	\$117.0m
Adjustments ¹	\$16.8m	-	(\$4.3m)	\$12.5m
Asset Cashflow Contribution ²	(\$1.8m)	(\$35.4m)	(\$15.8m)	(\$53.0m)
Net Completion Payment	\$27.0m	\$21.1m	\$28.4m	\$76.5m
Stock Entitlement (bbls)	207,868	158,691	480,000	846,559
Stock Value Inherited @ Completion ³	~\$18.3m	~\$13.5m	~\$40.2m	~\$72.0m

Future contingent considerations (YE 2025)

- INA Transaction
 - Block 3/05A up to \$2.5m subject to future Punja development⁴
- Sonangol Transaction
 - Up to \$28m over 8 years, paid as \$3.5m per annum, subject to oil price and production hurdles⁵
- Azule Transaction
 - Up to \$15m subject to Block 3/05A future developments⁶

¹ Relates to materialised contingent considerations, working capital adjustments and interests accumulated from effective date to completion date.

² Asset cashflow generation from effective date to completion, comprising crude oil sales less PIT and cash calls paid.

³ Stock value computed based on realized oil prices of \$88/bbl for INA, \$85/bbl for Sonangol and \$84/bbl for Azule.

⁴ Subject to development of Punja and a minimum Brent price of \$65/bbl.

⁵ Brent price threshold of \$65/bbl and requires minimum gross annual production of 15 kbopd.

⁶ Subject to development of existing discoveries and a minimum Brent price of \$75/bbl.

Delivering an Industry Transition in Angola

UK

1993

1.9 Mmbopd Production

~25 Bn Reserves & Resources (boe)

> 70% Production from IOC's

30 Years

North Sea Industry Transition

> 150 Transactions

~ \$50 Billion Value of Transactions

2023

- Majority of production today managed by Independents
- Improved Recovery
- Life Extension of Assets
- Increased Reserves & Resources
- Value creation for shareholders

Angola

2023

1.1 Mmbopd Production

~15 Bn Reserves & Resources (boe)

~ 95% Production from IOC's/NOC's

Positive Investment Environment

- Stable Government focused on reforms
- O&G industry core to Angolan economy
- Improved fiscal environment
- Abundant resources & opportunity pipeline

Opportunity for Afentra

- First mover advantage
- Partner with local companies
- Deploy operating expertise
- Supporting energy transition

Source: IHS Markit and Mergermarket Data.

Partnerships for Success

Partnership Model

- Strategic alignment on asset outlook and sustainability agenda
- Aligning with operators with proven capabilities
- Materiality of interest to ensure relevance and influence
- Influence through leveraging of technical expertise
- Partner credibility and ability of all partners to fund exposure to work programme
- Strong operating capabilities within the group, when operating partner

AGÊNCIA NACIONAL DE PETRÓLEO,
GÁS E BIOCOMBUSTÍVEIS

→ **Afentra adopts a technical led approach that adds value to the operator and wider partnership by presenting initiatives that maximise asset value**

History of the Asset

3/05

- Initial development phase 1983 – 1997 by ELF/Total
- Sonangol P&P operator since 2005
- Located 37km offshore, 60-100m water depth
- 4 processing platforms and 17 support structures
- First oil 1985 from Palanca
- Peak oil production ~ 200,000 bopd in 1998
- Peak water injection ~365,000 bwpd in 1999
- Water injection curtailed in 2015, restarted late 2020
- Last infill campaign closed out in 2010 (Pacassa)

3/05A

- First oil from Gazela field in 2015
- Wellbore shutdown in 2017
- Production restored March 2023

3/24

- >130 mmbbls discovered by ELF in the late 1980's
- Commerciality proven by Canuku development and production 2001-2008

Palanca terminal

- Floating storage and offloading facility 'FSO' sales point with a maximum storage capacity of ~2 mmbbls

Production Sharing Contract (PSC) Mechanics

Schematic Representation

Illustrative Scenario Assuming Full Cost Recovery

Key Fiscal Terms			
	Block 3.05	Block 3.05A (Caco Gazela)	Block 3.05A (Punja)
Cost Oil Limit	75%	50%	80%
Profit Oil Sharing			
State Profit Oil Share	60%	30%	30%
Contractor Group (CG) profit oil share	40%	70%	70%
Petroleum Income Tax (PIT)	50%	50%	25%
Illustrative Breakdown			
Gross Revenue	100%	100%	100%
Cost Oil Recovered	75%	50%	80%
Profit Oil	25%	50%	20%
State Profit Share	15%	15%	6%
CG Profit Share	10%	35%	14%
CG Pre-Tax Revenue	85%	85%	94%
PIT Payable	5%	18%	4%
CG Post-Tax Revenue	80%	68%	91%

* Block 3.05A (Punja) assumes a cost oil limit of 80% for first 4 years following first oil, reducing to 65% from year 5 onwards.

Angola Onshore: Risk Service Contracts in Context

Definition & Key Characteristics:

- RSCs – similar to PSCs - offer a clear commercial framework.
- In an RSC the contractor is compensated on a fee-based structure through a share of production.
- The state retains full ownership of resources, while the contractor focuses on efficient delivery.
- Exploration and development costs are paid by the contractor.

Examples of RSCs in Angola:

- Risk Service Contracts are an established part of Angola's upstream framework, used across multiple basins. Leading international operators, including Chevron, ExxonMobil, Azule Energy and Equinor, currently operate under RSCs in the Lower Congo, and Kwanza basins.
- Recent contracts include:
 - Chevron (Blocks 49 & 50, Lower Congo, 2024)
 - Red Sky + ACREP + Sonangol (Block 6/24, Kwanza, Dec 2024)
 - Azule Energy + Equinor + Sonangol (Blocks 18/15, 46, 47, Lower Congo, Dec 2023)

Risk Service Contract (RSC) Mechanics

Production Sharing Contract (PSC) Mechanics

Block 3/24 Risk Sharing Contract (RSC)

Schematic Representation

Fiscal Terms – Standard Terms

- Royalty or Petroleum Production Tax (“PPT”): 20%
- Petroleum Income Tax (“PIT”): 65.75%
- Petroleum Transaction Tax (“PTT”): 70%
- Depreciation: 4 years (before production) & 6 years (after production)
- Investment Premium: 30%

ROR (Rate of Return) Threshold	Payment in Kind to the Contractor Group (%)	Production Allowance (%)
<15%	95%	86%
15%<20%	94%	84%
20%<25%	93%	83%
25%<30%	92%	81%
>30%	90%	78%

Marginal Field Incentives

- Royalty or Petroleum Production Tax (“PPT”): 10%
- Petroleum Income Tax (“PIT”): 25%
- Petroleum Transaction Tax (“PTT”): 70%
- Depreciation: 3 years
- Investment Premium: 20%

ROR (Rate of Return) Threshold	Payment in Kind to the Contractor Group (%)	Production Allowance (%)
<10%	95%	95%
10%<15%	95%	85%
15%<20%	94%	75%
20%<25%	93%	65%
25%<30%	92%	50%
>30%	90%	35%

Why Angola?

+ Abundant Resources

Angola is Africa's second-largest oil producer, with vast untapped reserves. High quality mid-life assets primed for optimisation following prolonged period of underinvestment.

+ Stable political environment

A stable political environment has led to reforms which have improved economic stability and transparency in Angola's business environment.

+ New Venture Opportunities

Undeveloped and high-impact blocks being made available (eg Onshore Kwanza Basin Licensing Round).

+ Government Support

The Angolan government is actively seeking to attract foreign direct investment, offering incentives such as tax breaks and partnerships with the state-owned oil company, Sonangol.

+ Improved fiscal environment

The Angolan government continues to reduce the burden on international oil companies to attract foreign investments.

+ Improved governance

The establishment of the ANPG regulates the industry in line with global best practice.

Angola's Positive Transition

GDP:

\$113.2bn (World ranking 66, World Bank 2024)

Population:

36.75mn (World ranking 42, World Bank 2023)

Head of government:

João Lourenço (President)

Next elections:

2027, presidential and legislative

Corruption Perception Index (2024):

Angola received a score of 32 (on a scale from 0-100) and has shown significant improvements over the past years, gaining 13 points on the CPI since 2018.

Oil sector continues to play significant role (2024):

- Represents 95% of Angola's total exports
- Contributes over 50% of government revenue
- Accounts for ~15% of GDP

2017

- Mr Lourenço becomes president in elections replacing José Eduardo dos Santos, who ruled Angola for nearly four decades after independence in 1975 and through a long civil war that ended in 2002.

2018

- IMF approved a three-year, \$3.7bn loan. The IMF loan was contingent on Angola implementing multiple reforms including the 'Strategic Plan for the Prevention and Fight against Corruption' (2018-2022).
- Foreign Exchange Reforms: Repatriation of Capital; Foreign Exchange Liberalization.

2019

- Creation of ANPG to act as the regulator and concessionaire for the sector, separating these roles from the national oil company.
- Privatisation programme (2019-2022) launched, which entails the transfer of assets of nearly two hundred state-owned or state-controlled companies to the private sector — including several assets of Sonangol's economic group — and companies in the agribusiness, finance, transportation, and telecom industries.
- Tax and Fiscal Reforms: New Tax Incentives; Customer Regimes Improvements.

2020 - 2022

- Ratified the Paris Agreement on climate change (2020).
- Accepted as an 'Extractive Industry Transparency Initiative' implementing country.

2023

- National Development Plan (2023-2027) approved, which includes investments in education, reducing gender gaps, increasing access to finance, strengthening climate resilience, and sustaining efforts to improve governance.

Afentra's Founding Principles

The Global Energy Transition will take time.

Hydrocarbons are part of the transition and will continue to remain important in the overall energy mix.

It is vitally important that we **responsibly manage what has already been found**.

The **socio-economic impact of the energy transition** needs to be considered alongside the **climate impact**.

Afentra was formed to deliver this balance and **create significant value** for shareholders.

Current global energy environment make these principles more relevant today than when Afentra was founded in 2021

Sustainable change

**Uniquely positioned to capitalise on the
African Energy Transition**

1.

Significant hydrocarbon resource base in Africa with material M&A pipeline

2.

Gap in market for credible operators to facilitate safe and responsible transition

3.

Proven team with significant experience of working in Africa

4.

Committed to responsible stewardship and positive stakeholder outcomes

5.

African Energy Transition provides compelling investment opportunity
